

AGILE IDEAS

The event AGILE IDEAS is about the development of your cities or villages. It includes:

1) E-waste management

We know that so much amount of electronic waste is being produced around the world in the present days. Also we know about its consequences. So present your own way of reducing/recycling of electronic waste.

2) Water management

All of you might have faced the water problem in your cities or villages. We are facing this issue atleast once in a year. Most probably, some of us might have seen how this problem is being solved in other cities or in other places. Those people can present your best possible ideas to implement in your areas.

3) Innovative idea for NIT campus development

This is related to each and every aspect of our campus. The best idea is selected on the day of occasion.

4) Innovative traffic management :-

events registration.
